

checks the water level achieves the setting value, pump starts to work automatically.

5. “” Blower

Press “” to start the blower; press again to stop the blower.

IV. Precautions for Installation and Use

Users must carefully read the following precautions to ensure the normal use of the product, extension of its service life and the personal safety:

1. Users must install loads in strict compliance with the circuit diagrams and parameters supplied by our company.
2. The ground wire must be connected to the power supply line with good grounding.
3. The end user should use power supply cables in 3 x 3mm² or wider cable diameter. According to the National standards (GB). The socket should be of 30A or above according to the National standards (GB).
4. The end user should install air-break or leakage switch of 30A or above according to the National standards (GB).
5. Strictly check the power supply wiring of the control box. Power on to use only after no errors confirmed.
6. The electric appliances recommended by illegal manufacturers must not be connected to the controller. Unapproved dismantling and modification of the enclosed internal wiring are strictly prohibited. It is not allowed to connect or plug the wires and plug-in units on the power supply box during the power-on.
7. The connecting wires of the power supply box should be connected and plugged correspondingly according to the tags and specifications of the connectors. the output wires can not be short circuited each other.
8. After using, please cut off the power to avoid aging of the device.
9. The installation of the controller must be performed in strict compliance with the installation instructions by qualified persons.
10. No recoverable elements exist in the controller. Don't try to improve it by yourself for the high voltage in the controller can cause dangers. The maintenance and adjustment must be performed by professionals.

For any consequences caused by wrong operation, the user should bear the responsibility.

User' Guide

IMPORTANT:

Read this manual before proceeding with installation of the bathtub and keep it with the other accompanying documents.
This manual is valid for the installation of tubs both with and without whirlpool.

MODEL:M-208/M-208A (WS-168)

SIZE:1800X900X620mm

Install the diagram

Plane chart

Tap takes over sketch

3. Devices controlled by the controlling system

- 1) Pump : AC220V/2HP
- 2) Blower : AC220V/1HP
- 3) Lamp : AC12V/20W

4. Schematic Diagram of the PR9865 Control panel

III. Operation of Control Panel

1. When any function works, there is a sound of "di...".
2. "⏻" Power switch
Press "⏻" to start the controller; press again to stop the controller.
3. "☀️" Lamp
Press the power switch to turn on the lamp; then press "☀️" to turn off the lamp; press another time, lamp is turned on.
4. "🌬️" Pump
 4. 1 The water checking device of this controller protects the water pump from burning out.
 4. 2 Press "🌬️" to start the pump. When the water level lower than the setting value, pump stops working. When the water level achieves the setting value, pump starts working.
 4. 3 When the pump function is on, and the system checks the water level lower than the setting value, pump stops automatically. When any time the system

I. Safety Precautions

【Warning】

1. In order to prevent fire or electric shock accident, do not expose the controller to the rain or humid environment. There are dangerous high-tension fittings inside the controller, therefore do not open the cover. Entrust the repairing work only to the qualified professional repairing personnel when repairing is required.
2. Without the clear approval from the controller manufacturer or its authorized units, any change or alternation to this controller might bring various inconveniences to the users when in use.

【Helpful suggestion】

1. In order to prolong the service life of this controller, the time interval for continuously turning on and off the machine must be over 30 seconds.
2. Please switch off the power after use.
3. The power supply used must be consistent with the voltage specified value indicated on this controller; otherwise it will not work, or even burn out the controller.
4. When installing this controller, carefully check if the load parameters are consistent with the parameters required by this controller, otherwise it will not work, or even burn out the controller.
5. If it is halted accidentally, please close and restart.

II. Brief Introduction

1.General Description of Functions

Functions	Model	PR9865
1	Inducing technology	✓
2	Lamp	✓
3	Pump	✓
4	Blower	✓
5	Level detection	✓

2.Characteristics of the Controller

- 1) Rated voltage : AC220V ~AC240V
- 2) Working voltage range : AC180V ~ AC248V
- 3) Rated power : 50HZ/60HZ
- 4) Controllable current : <25A
- 5) Power consumption : <10W (all loads OFF)
- 6) Applied ambient temperature : +5℃~40℃
- 7) Step-down transformer meeting the requirements of 1500V high voltage test as specified by IEC standard.

1、Electricity parameter

Rated voltage	Rated power	Rated electric current	Reference circuit voltage
220VAC	750W	<4A	12V

2、Electric installation

- 2.1 power supply's establishment should be complied with nation security standard, voltage and frequency also should be accord with product's nameplate. Especially install creep-age protect switch and also check whether can connect with ground.
- 2.2 The wire collected to the massage bathtub should be fitting permanent., and the wire should be a three-core wire, the sectional acreage of each core cannot less than 12A. when wire pass the wall, it should be use bushing for protection until the AC outlet.
- 2.3 Ground wire of bathtub should be test whether works with house appliance ground wire.
- 2.4 The wire end of electricity control box should connect to the control panel, water bottom light, loudspeaker, electrical engineering and the detector protection respectively.

3、Water supply device

- 3.1 This device's hydraulic pressure is 0.2-0.4Mpa.
- 3.2 The water supply characteristics on the wall: The cold or hot water supplies inside the bathroom also establish in the shelter of the massage tub, use the hose to connect with the cold or hot joint of the tub. the pipe towards is decide by the customer, the machine do not go with the hose.

4、Installation introduction

- 4.1 Before install, must consider the place of install massage bathtub whether can support this device's pressure.
- 4.2 Place the massage bathtub on the install position, adjust level to make the drain system smooth.
- 4.3 Adjust the leg's screw to make sure all of the screw touch ground completely.
- 4.4 Install the drain hose, and make some measure to against on the connector.
- 4.5 Fix cold and hot water-pipe well, then install the showerhead. And then put drain into downcomer, finally connect with power and make sure whether device connected with ground can work.

5、Using Method

- 5.1 Turn on faucet, adjust water's temperature, add water to the massage bathtub. when the highest water level exceed the highest nozzle about 20-30mm and reach the detector, press the switch button to let the electric machine.
- 5.2 Revolve the adjust switch ,and choose the proper surf pressure.
- 5.3 After finishing if should turn off pump at first, then open drain button, when water is all out , please make a clean of bathtub to keep in good.

6、Clean and keep in good condition

- 6.1 usually use soft cloths and general liquid cleanser can wash away dirt , but forbid to use the cleanser with acetone or the ammon ia composition; when disinfect, forbid to use the disinfectant contained the formaldehyde.
- 6.2 the dirty spot of surface can use the toothpaste to wipe with the soft cloth .
- 6.3 to the low-grade chafe of the surface or burned by cigarette, can soak in water to whet with 2000# levigation sand paper, then polishing.
- 6.4 If the electroplate piece contain stain, use the soft cloth to wipe lightly, avoid to wiping with coarse cloth.
- 6.5 often clean up the backwater net cover, prevent it from stop;

- 6.6 Check whether have break on pipe and waterway aperiodically.
- 6.7 Please check whether there is fall off or breakage on wire, switch, connector plugs so that repair in time.
- 6.8 In order to keep to use in a long term ,please remember, don't use more than 3 hours continually.

7、Fault eliminate

Fault	Cause	Way
Machine or equipment doesn't work	Voltage unstable	Check circuitry
	Power connector didn't connect well or open circuit	Insert again or change power line
	The windpipe connect air switch fall off or break	Connect again or change
	The air switch failure	Change
Big nose of machine	Power's parameter is not same as nameplate	Connect with supplier
	Fixed screw did'n fix or fall off	Fix tightly again
	Support's leg screw did not touch ground	Adjust
water pipe leak out	Aging	Change
	The joint did not fix well	Fix again
	Water pipe or accessory leak	Change

Remark: except this fault, please according to situation to resolve, or find experienced people to repair.

8、special remind

- 8.1 please find qualified people to install bathtub according to introduction.
 - 8.2 when you are using it, first of all you have to inject the cold water and then inject the hot water. Don't inject the hot water first.
 - 8.3 bathtub's machine must connect on ground, support must use 1.5mm²yellow/green double wire connect with ground and check whether effective.
 - 8.4 please do not turn on machine without water, before draining should turn off machine.
 - 8.5 children should be looked after in bathtub.
 - 8.6 bathtub's temperature can't higher than people average temperature, and the best is 32-37centigrade.
 - 8.7 after shower ,please cut off power.
 - 8.8 if have these situation ,please do not enter into massage bathtub.
 - 8.8.1 younger than 4 years old's child;
 - 8.8.2 blood circulation unstabled people;
 - 8.8.3 sot;
 - 8.8.4 suffer from flu;
 - 8.8.5 heart disease;
 - 8.8.6 already have sauna;
 - 8.8.7 after meal in half a hour;
- Remark: our company has the right to modify the above mention without further notice.

Bathtub User's Guide

WARNINGS

1. Please follow the instruction contained in the attached installation manual to ensure that the product is installed properly. the manufacturer will not be held liable for damages or injuries caused by improper installation.
2. Follow the instructions contained in this manual when using the product.
3. Before using the bathtub, check the local voltage that if reach to the rated voltage(pre-installation card).
